

Kress Evaluation

Pre-Post Survey
Data Report

Cara Bodenmiller
Graduate Assistant
Mercyhurst Civic Institute

Survey Results

The survey responses were analyzed by comparing the pre and post-test answers for each of the survey questions. Pre-tests were administered prior to the Kress Presentation and post-tests were administered after the Kress Presentation. By using the unique identifiers at the beginning of the pre and post-tests, pre-test responses were matched up with the respondents' corresponding post-tests. Only the answers from the 100 respondents with both a pre-test and post-test were utilized to calculate the survey results.

The survey results were analyzed by comparing the valid percentages for answers in the pre and post-tests and then by calculating the percentage change. For the first 44 questions, the post-test results were higher than the pre-test results in the combined Agree and Strongly Agree categories and lower in the combined Somewhat Disagree and Strongly Disagree categories.

Taking drugs scares me.		Pre	Post	% change
	Strongly Disagree	2	0	-2
	Somewhat Disagree	17	4	-13
	Agree	38	16	-22
	Strongly Agree	43	80	37

I don't want to hang around anyone who uses marijuana.		Pre	Post	% change
	Strongly Disagree	13	2	-11
	Somewhat Disagree	21	6	-15
	Agree	21	10	-11
	Strongly Agree	44	82	38

I would try to talk a friend out of using drugs.		Pre	Post	% change
	Strongly Disagree	2	0	-2
	Somewhat Disagree	7	2	-5
	Agree	29	9	-20
	Strongly Agree	62	89	27

The music that my friends and I listen to makes drugs seem cool.		Pre	Post	% change
	Strongly Disagree	43	30	-13
	Somewhat Disagree	34	34	0
	Agree	13	19	6
	Strongly Agree	10	17	7

Heroin is a dangerously addictive drug.		Pre	Post	% change
	Strongly Disagree	2	0	-2
